Remarks

This communication is responsive to an amendment filed on 10/20/2004.

Based on the Applicant's remarks filed on the abovementioned date, the previous election of species requirement has been withdrawn. A new election of species requirement is attached below:

Election/Restrictions

This application contains claims directed to the following patentably distinct species of the claimed invention:

- I. See species of Figs. 1-6
- II. See species of Figs. 7 and 9
- III. See species of Figs. 8, 10 and 16
- IV. See species of Figs. 11-15 and 19A-19B
- V. See species of Fig. 17
- VI. See species of Fig. 18
- VII. See species of Fig. 20

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claim 1 is generic

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable

Art Unit: 2653

thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Bach Q. Vuong whose telephone number is (571) 272-7596. The examiner can normally be reached on Monday-Friday.
